

SEPTIC TANK & LAGOON

Do's

- Have your septic tank inspected and pumped every 3-5 years.
- Use water efficiently to reduce the amount of wastewater entering the system.
- Dispose of household waste properly—only human waste and toilet paper should be flushed.
- Keep the drain field clear of heavy objects, vehicles, or construction.
- Plant grass over the drain field to promote proper drainage.

Dont's

- Flush non-biodegradable items like wipes, feminine hygiene products, or paper towels.
- Pour grease, oil, or chemicals down drains.
- Use excessive amounts of household cleaners or bleach.
- Install structures like decks or patios over the septic system.
- Ignore warning signs like slow drains, foul odors, or pooling water near the drain field.
